

PP5FOS Series Stainless Steel Housing Sediment and Scale Reduction Type

Designed for commercial water heater and tankless heating systems

Atlas Filtri® PP5FOS are stainless steel high flow filtration systems for the reduction of sediment and scale in commercial water heater and tankless heating system applications. Stainless 316 housings can incorporate Atlas Filtri melt blown 5-micron sediment filters with polypropylene. The polyphosphate is a special grade of media to reduce scale build up on heater coils and heating tank systems.

The multi-cartridge housing is a complete line of five around models to accommodate a wide range of flow rates. Designed pressure of 150psi (10 bar) at 300°F (149°C). Standard inlet and outlet connection are 2" MNPT. Standard finish is poly-coat over stainless. Standard gasket is FDA grade Buna-N.

Melt blown CPP smooth cartridges with heights from 10" to 40" are made to comply with the most stringent regulations for applications in drinking water. These five-micron polypropylene cartridges are suitable for many filtration applications due to its wide chemical-physical compatibility to a variety of water-based solutions.

The polyphosphate incorporated into the center core of the filter is design as a slow release, low acid media specifically for extreme water conditions found in high temperature filtration applications. The media is designed to last six months as it releases slowly into the water supply. When ordering this design, a smaller stem is also required to accommodate the filter with the media included.

Atlas Filtri is driven to providing our customer with the best available products to meet specific filtration requirements. This is done by using the most advanced manufacturing and design methods. The international patents received come from a constant commitment to research and develop that result in new and innovative products.

PP5FOS
Stainless Steel Housings

10", 20", 30", and 40"
Sediment Filter with Scale
Reduction Media
Filters and Stems Ordered Separately

Features

- Designed for commercial and industrial filtration applications
- Heavy-duty stainless-steel construction
- Pipe fittings readily and easily accessible
- Knife-edge seal at both cartridge ends for a positive and seal eliminating by-pass
- Standard double open-ended cartridges with scale reduction media included
- Flange connections optional
- 5-micron polypropylene melt blown filters
- Polyphosphate glassy bead for slow even release of media

Specifications

Materials:

Housing Construction: 316L Stainless
Seal: FDA Grade Buna-N rubber
Filter Construction: Polypropylene
Filter Media: Glassy Polyphosphate

Working Conditions:

Working Temperature Range:
Min 39.2°F (4°C) – Max 177°F (80.6°C)

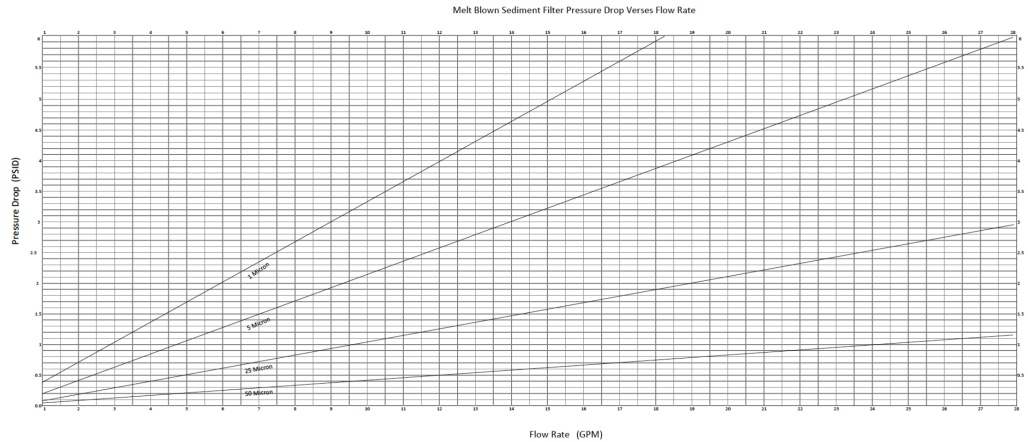

Media Temperature Range:

Max 220°F (104°C) in heated environment

PRODUCT SPECIFICATION and PERFORMANCE

Listed PP5FOS housing models with optional sediment and scale reduction cartridges and stems

Model	Quantity (Length) of Cartridge (1)	Flow Rate GPM (2)	Pipe Size	Drains	Max Cartridge Diameter	Shipping Weight Clamp	Box Size Clamp	Clamp Style Dim A
PP5FOS1 RA5775508	5 Cart 10" CPP-SP 10 SX 5 Micron Sediment/Scale Filter (QTY 5 required)	35	2" NPT	1/2" NPT	2 3/4" DD	25 lb	12x12x23	20 7/8"
PP5FOS2 RA577526	5 Cart 20" CPP-SP 20 SX 5 Micron Sediment/Scale Filter (QTY 5 Required)	70	2" NPT	1/2" NPT	2 3/4" DD	31 lb	12x12x33	30 7/8"
PP5FOS3 RA5778508	5 Cart 30" CPP-SP 30 SX 5 Micron Sediment/Scale Filter (QTY 5 Required)	105	2" NPT	1/2" NPT	2 3/4" DD	38 lb	12x12x43	40 7/8"
PP5FOS4 RA5779508	5 Cart 40" CPP-SP 40 SX 5 Micron Sediment/Scale Filter (QTY 5 Required)	140	2" NPT	1/2" NPT	2 3/4" DD	45 lb	12x12x53	50 7/8"

Dimensions of Clamp Style Unit

Model Number	Height A	Inlet Center B	Outlet Center C	Flange Distance D
PP5FOS1	20 7/8"	7"	3"	10 1/4"
PP5FOS2	30 7/8"	7"	3"	10 1/4"
PP5FOS3	40 7/8"	7"	3"	10 1/4"
PP5FOS4	50 7/8"	7"	3"	10 1/4"
