

OASIS Reverse Osmosis and Ultraviolet System

Disinfectant Water Purification System For Drinking Water, Ice, Hot Water, and Cooking Applications

Atlas Filtri® OASIS Under Counter Reverse Osmosis Water Purification System with UV Disinfectant Technology is designed to meet all of your drinking and cooking water requirements.

The system is designed to provide up to 50 gallons of pure water a day. In addition to the secondary faucet at the sink, the system can be connected to a refrigerator for ice and water dispensing, an under counter ice machine, a hot water dispensing system, or all points of use.

The system will reduce total dissolved solids and contaminants in the supply water up to 99% through the RO separation process. The ultra-fine membrane filters everything larger than 0.00001-micron. Most commonly known contaminants removed are fluoride, arsenic, aluminum, barium, cadmium, chlorine, chromium, lead, mercury, and nitrates. The patented single-molded manifold with three housings reduce potential leak points and make the system more efficient.

The clear sediment filter in the first stage gives an indication of just how dirty the water can get over a month of water production. UV technology is proven protection to control possible microbiological (bacteria & virus) issues in water including E.coli, Cryptosporidium, and Giardia lamblia. The added Ultraviolet unit offers an even greater protection of the home's cooking and drinking water.

The mineralization cartridge provides bottle quality water from the reverse osmosis system. This alkaline enhancer cartridge improves the taste of drinking water and raises the pH by making the water less acidic.

Atlas Filtri® is driven to providing our customer with the best available products to meet specific filtration requirements. This is done by using the most advanced manufacturing and design methods. The international patents received come from a constant commitment to quality.

Part Number: RE6075310-UV

TW30-1812-50HR elements have been tested and certified by **NSF** International against **NSF/ANSI** Standard 58 for material requirements

Housings certified by IAPMO RT to NSF/ANSI 42, 61, 372 lead free, CSA B483.1. In compliance with drinking water regulations, USA and Canada

Replacement Parts for Reverse Osmosis & UV System

Change filters at a minimum of every 12 months and membrane every 36 months

Oasis Pre-Filter Cartridges

Stage 1: Sediment 5-micron filter

Stage 2: CTO Granulated Activated Carbon (GAC) filter

Stage 3: VOC/CYST 0.5-micron carbon block filter

Replacement Lamp
Ultraviolet Sterilization Unit
Change-out every 12 months

Post-Inline Filter
Activated Carbon Polishing Filters

Alkaline Mineral Cartridge
Remineralization and pH adjustment post-filter

O-ring
Three O-rings replaced on filter change-out

Pre-Filter Housing Wrench
Designed to Open Pre-Filter Housing for Filter Cartridge Replacement

LubriKit+
O-ring lubricant required for a proper seal

Reverse Osmosis Membrane
Cartridge – 50 gallons per day
Change out every 36 months

FilterFIT
Pre-Filter Centering Device for proper alignment

Part Number	Description	BarCode
RE7402010	RO Membrane 50 GPD – 1812S	8021647229557
RE6075221	Post Inline Activated Carbon Filter Alkaline Re-Mineralization Cartridge Pre-Filter Cartridge Kit (Quantity 3) O-ring Kit for DP TRIO (Quantity 3) LUBRIKit+ O-ring Lubricant FilterFIT Filter Cartridge Centering Device Wrench RO System DP	8021647284518
UV-RF-OASIS	UV Replacement System	00857923008169
